THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

EXAMINER'S AMENDMENT

1. A response was received on 02 January 2008. By this response, Claims 1, 12, and 23 have been amended. Claims 1-5, 7-16, 18-27, and 29-33 are currently pending in the present response.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

Please **REPLACE** Claim 1 with the following amended claim:

1. A system comprising:
 - a controller module comprising instructions for controlling a first component, wherein the controller module is provided dynamically;
 - a storage system ~~capable of~~ storing a set of semantic programming that enables a second component to understand the semantics of a set of universal interfaces associated with the controller module; and

the second component with a security system that interacts with the controller module to implement a security protocol before the second component can control the first component based on executing the instructions in the controller module, wherein the controller module provides secure control of communications between the first component and the second component, and wherein the security system decrypts an encrypted controller module to perform a portion of the security protocol, the second component controlling the first component based upon the execution of the instructions in the controller module without the second component having prior knowledge of the first component, wherein the stored set of semantic programming enables secure ad hoc interaction between the first and second components.

Oath/Declaration

3. This application presents a claim for subject matter not originally claimed or embraced in the statement of the invention. Specifically, in independent Claim 12, the limitations directed to the new method step of storing a set of semantic programming and other limitations further directed to the semantic programming were not originally claimed as part of Applicant's invention, nor were they embraced in the statement of the invention (see for example, page 2, paragraphs 0004-0006 of the present specification, and also the abstract). Similarly, the limitations directed to corresponding structures in independent Claim 1 and corresponding steps performed in independent Claim 23 were not originally claimed or embraced in the statement of the invention. A supplemental

oath or declaration is required under 37 CFR 1.67. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

4. Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth in this communication. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the “Notice of Allowability” (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the “Notice of Allowance” (PTOL-85) and the application number in the upper right hand corner.

Allowable Subject Matter

5. Claims 1-5, 7-16, 18-27, and 29-33 are allowed.

6. The following is an examiner’s statement of reasons for allowance:

Independent Claim 1 is directed to a system that includes, *inter alia*, a dynamically provided controller module that includes instructions for controlling a first component; storage for a set of semantic programming that enables a second component to understand semantics of universal interfaces associated with the controller; and the second component, that includes a security system that interacts with

the controller to implement a security protocol before the second component can control the first component, where the security system decrypts an encrypted controller module, where the second component controls the first component using the instructions in the controller module without having prior knowledge of the first component, and where the semantic programming enables secure ad hoc interaction between the first and second components. Independent Claim 12 is directed to a corresponding method, and independent Claim 23 is directed to a software implementation of the method of Claim 12.

The closest prior art, Nakagawa et al, US Patent 6530025, discloses systems, methods, and software largely as claimed (see the previous Office action). However, Nakagawa is silent on the storage of any semantic programming enabling the second component to understand universal interfaces or enabling secure ad hoc interaction between components. "UPnP Device Architecture" generally discloses the use of semantic programming that enables components to understand semantics of universal interfaces (see, for example, page 1, Introduction, "What is UPnP", where the Universal Plug and Play architecture supports zero-configuration, "invisible" networking, and automatic discovery of devices, among other things). However, the UPnP document is silent as to any security measures provided to or enabled for the ad hoc interactions by the semantic programming. Therefore, the present claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Edwards et al, US Patent 7296042, is the patent that issued from Application Serial No. 09/838,933, which was incorporated by reference in the present specification (see page 5, paragraph 0016, of the present specification).
- b. Edwards et al, US Patent Application Publication 2004/0024787, discloses a system that enables arbitrary components on arbitrary networks to communicate.
- c. Edwards et al, US Patent Application Publication 2004/0236943, discloses a system and method that allows components to implement data transfer security including encryption and/or signatures.
- d. Wolf et al, US Patent 5818447, discusses the use of OLE for application integration by defining standard interfaces which are semantically related.
- e. Miller et al, US Patent 5835768, discusses the use of the POSIX standard that established standard semantics for creating portable applications.
- f. An et al, US Patent 6694368, discloses a system including software buses that are standardized by semantic properties.

- g. Kumbalimutt et al, US Patent 6871346, discloses a system that includes the definition of a standard set of interfaces having the semantics of the system residing on a server.
